Project: Development of Agency Migration to Geodatabase Course
Location: Las Vegas, Nevada
Client: Clark County Nevada
500 S Grand Central Pky
Las Vegas, NV 89155-4000
Contact: Mr. Erik Martinet– (702) 455-5586
Electronic Mail: ema@co.clark.nv.us
Duration: May 2003-August 2003

Clark County, NV has been known as one of the first implementations of ArcInfo and has always had advanced users. With a tightly knit user base surrounding the County’s data clearinghouse, they need to be prepared to make the geodatabase migration. IGIST is instructing multiple courses entitled “Agency Migration to the Geodatabase”. This is offered to users from a variety of agencies within the County. The class focuses on ArcGIS productivity issues and incorporates some Clark County geodatabase prototypes that IGIST developed. The prototype models are in water and ownership. Follow on support for the students are provided.

Key Personnel:

Dawn Martin
Geodatabase Analyst

Key Components:

- Needs Assessment
- Database Design
- Documentation Creation
- Onsite Training
